**Macintosh Service Company Celebrates 20th Anniversary
with Upgraded Certification from Apple, Inc.**

Millersville, MD - May 11, 2009 – MacMedics, a 20 year old full-service Apple Authorized consulting, sales and repair firm announced today that Apple, Inc. has promoted their status to an Apple Authorized Value Added Reseller (VAR).

Apple's VAR program is designed for resellers and integrators that deliver highly specialized, turn-key solutions—including the audio, broadcast, film, networking, Original Equipment Manufacturer, photography, publishing, scientific/technical, storage, and video markets. Apple has recognized MacMedics for its work in integrating Macs into existing Windows environments, as well as for replacing Windows-based servers with more reliable and secure Macintosh servers. Over its 20-year history, MacMedics has handled 50,000 on-site service calls and possesses 200 plus years of combined Mac experience across its 20 employees.

“With this additional designation from Apple, MacMedics will expand its focus on Macintosh network integration, which has long been a major part of our consulting practice,” states Dana Stibolt, president and founder of MacMedics. “The additional resources the Apple VAR authorization provides will greatly enhance the personal services that we can offer our clients.”

MacMedics is also an Apple Authorized Service Provider, and offers walk-in Apple service for both in and out of warranty Macs, and out of warranty iPods and iPhones in their repair centers in Millersville, MD and Lanham, MD. MacMedics is also an Apple Developer as well as an Apple Authorized Government Distributor
